SAFEGUARDING THE FUTURE OF THE GLOBAL SEAWEED INDUSTRY

Over the last four years, GlobalSeaweedSTAR has worked to support the sustainable development of the global seaweed industry.

The programme has addressed key challenges faced by the industry and provided practical solutions to them, while also growing the research and innovation capability of developing (DAC-list) countries engaged in seaweed farming.

We invite you to join us online at the GlobalSeaweedSTAR finale to hear all about the impact and legacy of this unique programme.
